Make checks payable to Gregg & Pease.

Orders filled strictly in turn.

CARE OF VIOLETS

Soil: Equal parts sand, garden soil and humus. Give plenty of light, but not strong sunlight. In watering, use water of room temperature, taking care not to wet the leaves. Keep moist at all times but do not allow them to stand in water. Night temperature of 65 degrees, day temperature of 70 degrees to 75 degrees.

The two worst pests of these plants are cyclamen mite and mealy bug. Cyclamen mite causes leaves to curl and become thick and stunted in center of plants. This cannot be controlled under home conditions. Mealy bugs may be killed by touching them with a toothpick wrapped in cotton and dipped in alcohol or kerosene.

75 to 100 Varieties of Violets Being Propagated

No order accepted for less than two plants. Plants from 2½ inch pots, \$1.25 each.

Plants sent by special handling.

If wanted by mail, for two to six plants, add 50c to order for postage and packing.

For seven or more plants, add \$1.00 to order for postage and packing.

If wanted by special delivery, add 25c more to the above.

Positively no order accepted for plants not checked unless you want us to hold the order until the plants are ready.

Additional varieties. Some not checked will be ready in spring.

Those double checked supply limited, only one to an order.
